

INDUSTRIE

“ Chi ama e conosce il vino sa bene
quanto sia nobile e antica
l'arte di preservare la qualità nel tempo.
Le cantine climatizzate IP
sono l'espressione evoluta di quest'arte. ”

V EDIZIONE

*“ Those who love and appreciate wine
know very well how noble and ancient
the art of maintaining quality is.
IP chilled cabinets
are an advanced form of that art. ”*

5th RELEASE

IP S.p.A. nasce come industria specializzata in armadi refrigerati per la conservazione e il servizio del vino. La nostra storia è caratterizzata dalla volontà di progettare e realizzare le soluzioni più idonee ed eleganti per soddisfare le più svariate esigenze sia nella ristorazione che nel privato.

IP S.p.A., grazie all'esperienza e ad un personale altamente qualificato, pone sul mercato mondiale una vastissima gamma di prodotti, non solo per la conservazione ed il servizio del vino, ma anche per sigari (Linea Humidor) e per la stagionatura e conservazione dei salumi e dei formaggi (Linea Salumeria).

L'alta tecnologia, la raffinatezza delle forme e la qualità dei prodotti, fanno della collezione IP un'alta espressione del Made in Italy in tutto il mondo.

IP S.p.A. was established as a specialist in the production of chilled cabinets for storing and serving wine. All through our history, our mission has been to design and produce the most suitable and stylish solutions to fulfil the needs of the catering industry and private customers.

Relying on extensive experience and highly-skilled staff, IP S.p.A. sells on the world's markets a very wide range of products, not just for storing and serving wine but also for cigars (the Humidor range) and for the ageing and storage of hams and cheese (the Salumeria range).

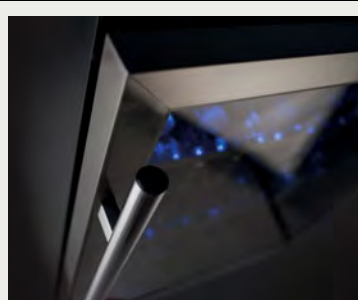

The high technology, sleek lines and quality of its products make the IP Collection one of the loftiest expressions of Italian-made products in the world.

VINITALY

Ip s.p.a. propone un nuovo sistema a quattro allestimenti variabili, ideale per esporre le bottiglie di vino sia nell'ambito ho.re.ca che in quello domestico.

MODULO A – STANDARD: Bottiglie in posizione verticale verso l'esterno e orizzontali all'interno.

MODULO S – RIPIANI SCORREVOLI DI LEGNO: Bottiglie disposte orizzontalmente.

MODULO O – 45 GRADI: Bottiglie frontali inclinate a 45° per dare visibilità all'etichetta.

MODULO L – LIGHT: Bottiglie in posizione verticale.

Tali moduli di allestimento possono essere personalizzati, cambiando posizione e quantità dei ripiani, per soddisfare le diverse esigenze e necessità del cliente.

Ip s.p.a. proposes a new system with four variable settings, ideal for displaying bottles of wine both in the ho.re.ca and in the or domestic sector.

MODULE A - STANDARD: Bottles in vertical position towards the outside and horizontal inside.

MODULE S - WOOD SLIDING SHELVES: Bottles arranged horizontally.

MODULE O - 45 DEGREES: Front bottles tilted at 45 ° to give visibility to the label.

MODULE L - LIGHT: Bottles in vertical position.

These fitting modules can be customized, changing position and quantity of shelves, to meet the different needs and of the customer.

La ricerca IP Industrie ha sviluppato un sistema multifunzionale ideato per conservare i piu' pregiati prodotti enogastronomici.

La linea "dispensa" e' stata studiata per garantire al cliente la massima liberta' nel personalizzare ed organizzare le diverse zone, in funzione del prodotto da preservare.

Ip industrie's research has developed a multipurpose system to store your most valuable foods and wines.

The range "larder" has been designed to provide the customer with greatest freedom in customising and arranging different areas, depending on which products are to be stored.

W - VINO - WINE

PER IL MANTENIMENTO E SERVIZIO DEL VINO. AMPIA SCELTA DI GRIGLIE REGOLABILI PER LO STOCCAGGIO DELLE BOTTIGLIE

*TO STORE OR SERVE WINE.
A WIDE RANGE OF ADJUSTABLE SHELVES TO STORE BOTTLES*

S - SALUMI - HAM

PER LA STAGIONATURA E SERVIZIO DEI SALUMI, ALLESTIMENTI PERSONALIZZATI PER LE DIVERSE TIPOLOGIE DI PRODOTTO

*TO CURE OR SERVE COLD MEATS
CUSTOMISED LAYOUTS FOR DIFFERENT PRODUCTS*

SG - SIGARI - CIGARS

INDISPENSABILE PER IL MANTENIMENTO DEI SIGARI. DOTATO DI UMIDIFICATORE MOD. V 1013, PERMETTE L'IMPOSTAZIONE DELL'UMIDITA' RICHIESTA

*ESSENTIAL TO STORE CIGARS.
EQUIPPED WITH DEHUMIDIFIER (mod. v. 1013) WITH ADJUSTABLE HUMIDITY SETTING*

F - FORMAGGI - CHEESE

PER IL MANTENIMENTO E SERVIZIO DEI FORMAGGI. ELEGANTI E FUNZIONALI RIPIANI SCORREVOLI PERMETTONO GRANDE VERSATILITA'

TO STORE OR SERVE CHEESE. ELEGANT, PRACTICAL SLIDING SHELVES FOR UTMOST FLEXIBILITY

V - VEGETALI - VEGETABLES

UN AMPIO SPAZIO PER LA FRESCHEZZA DI FRUTTA E VERDURA. ELEGANTI RIPIANI IN LEGNO

*A LARGE AREA TO KEEP FRUIT AND VEGETABLES FRESH
ELEGANT, PRACTICAL WOODEN SHELVES*

LINEA
HUMIDOR

I sigari preparati a mano sono prodotti interamente naturali, per questo motivo, se non conservati alle giuste condizioni ambientali, nel tempo andranno incontro a deterioramento. Un alto tasso di umidità e una temperatura stabile, compresa tra 17° e 20°C, costituiscono i valori ambientali ideale per la loro conservazione. Per mantenere queste condizioni è essenziale avere un humidor. IP Industrie, a completamento di un'ampia gamma di celle per la conservazione ed il servizio di vino, salumi e formaggi, propone due sistemi di Humidor necessari per il buon mantenimento e la perfetta presentazione dei sigari.

Hand-made cigars are entirely natural products; that's why, if they are not stored under the right room conditions, they will eventually deteriorate. A high humidity rate and a steady temperature, ranging between 17 and 20 degrees, are the ideal storage conditions. To keep them in such conditions, a humidor is a must.

IP Industrie had added up to its wide range of cabinets for storing and serving wine, sausage and cheese, two types of humidors which are essential to store and showcase cigars in the best possible way.

CK 401 SG

V 1015 (UMIDIFICATORE / HUMIDIFIER)

Il modello V 1015 utilizzato da IP Industrie, può essere montato all'interno di una delle nostre vetrine climatizzate a vostra scelta. Permette di generare il micro-clima ideale per la conservazione dei sigari: 18°C circa e 70% RH di umidità. Nelle nostre celle, grazie al sistema refrigerazione / riscaldamento ed all'apposito termostato elettronico, è possibile impostare sia la temperatura che l'umidità desiderata. Utilizzabile nei modelli da 150 a 400 L.

The V 1015 model used by IP Industrie can be fitted into any one of our chilled cabinets. It produces the ideal microclimate to store cigars: approximately 18° and 70% relative humidity. The cooling/heating system and electronic thermostat in our chilled cabinets, enable you to set the temperature and humidity you like. Fit for 150- to 400-litre models.

L'aria presente all'interno della cella viene aspirata dall'umidificatore. In questo speciale dispositivo dotato di una batteria di lamelle rotanti, l'aria passando attraverso l'acqua, acquista umidità. Odori e particelle di sporco vengono trattenute nell'acqua che fa quindi da filtro.

The air into the store flows into the humidifier. In this special device featuring a revolving-blade battery, the air, as it passes through the water. Odours and dirt particles are trapped by the water, acting as a filter.

CHILLER

ABT 2 CF

ABBATTITORE DI TEMPERATURA FAST CHILLER

ABT 2 CF è un indispensabile e semplice strumento di lavoro. Bastano pochi minuti per raffreddare le vostre bottiglie e portarle alla temperatura di servizio desiderata. E' studiato per essere utilizzato sia con bottiglie di vetro che di plastica ed anche lattine; è dotato di due alloggiamenti, di cui uno per bottiglie di grosso diametro o magnum. Di facile uso, con regolazione indipendente del tempo di refrigerazione per ogni postazione, è uno strumento essenziale per ristoranti, bar ed enoteche che vogliono poter servire sempre i loro vini alla temperatura perfetta.

TEMPI DI RAFFREDDAMENTO: -1,5 °C AL MINUTO (BOTTIGLIE IN VETRO DA 750 ML).

IL SISTEMA DI REFRIGERAZIONE CON COMPRESSORE PERMETTE DI PORTARE IL LIQUIDO IN VASCA (MISCELA GLICOLE / ACQUA) ALLA TEMPERATURA DI REGIME DI -35°C.

ABT 2 CF is a user-friendly, must-have working tool. Just a few minutes are required to quickly cool down your bottles and bring them to the temperature desired. Our fast chiller can be used for glass bottles, plastic bottles or cans. It comes with two casings: one of them is specially conceived for large or magnum bottles. ABT 2 is easy to use as the two casings have an independent cooling time adjustment system. Our fast chiller is an unmissable tool for restaurants, bars and wine shops aiming at serving wines at the perfect temperature.

COOLING TIME : -1,5°C PER MINUTE (750 ML GLASS BOTTLES).

OUR REFRIGERATION SYSTEM IS EQUIPPED WITH A COMPRESSOR THAT ALLOWS BRINGING THE LIQUID IN THE TUB (GLYCOL/WATER MIX) AT THE SERVICE TEMPERATURE OF -35°C.

LA VERRE
DE VIN

LA VERRE DE VIN

È un innovativo sistema, semplice e funzionale, che consente di preservare il vino in un numero illimitato di bottiglie aperte. Potrete sempre servire un calice di vino sia fermo che frizzante, come se fosse appena stappato. Facile da usare, il nostro sistema richiede solamente da 2 a 5 secondi (in base alla quantità di vino rimasto) per creare, all'interno della bottiglia, il vuoto idoneo alla perfetta tenuta del vino. Il controllo del livello del vuoto è essenziale per assicurare il massimo periodo di mantenimento del vino, senza arrecare danni o modificarne la struttura.

Nella versione DUAL è possibile avere la stessa funzione di mantenimento anche per le bottiglie di spumante o champagne, tramite l'introduzione di quantità controllata di diossido di carbonio (CO_2). All'interno delle bottiglie viene così ricreata la pressione equilibrata e precisa che assicura la naturale frizzantezza dello spumante e dello champagne.

An advanced, easy-to-use, functional system allowing to preserve an unlimited number of open wine bottles. You will always be able to serve a still or sparkling wine glass as if the bottle had just been uncorked. This easy-to-use system only requires 2-5 seconds to create a perfect vacuum inside the bottle. Vacuum control is vital to ensure maximum wine conservation time with no damage or structure change.

The dual version also provides for the same preservation system for either sparkling wine or champagne with the introduction of a controlled quantity of carbon dioxide (CO_2). A balance, accurate pressure is thus created inside the bottles ensuring a natural sparkling for wine and champagne.

ISTRUZIONI PER L'USO - USER INSTRUCTIONS

Un illimitato numero di vini può essere servito in modo perfetto utilizzando il sistema "Le Verre de Vin" e gli appositi tappi.

Serve an unlimited number of perfectly preserved wines. "Le Verre de Vin" system only requires a special cork for each bottle you use.

VINI FERMI - STILL WINES

Dopo avere servito un calice di vino, inserire nella bottiglia l'apposito tappo di gomma dotato di valvola di non ritorno in sostituzione del sughero originale. Per attivare "Le Verre De Vin" collocare la bottiglia al sistema di aspirazione e fare una leggera pressione; in questo modo la bottiglia verrà sigillata. L'accensione della spia arancione indica che il sistema è in funzione; nel giro di 2/5 secondi si illuminerà la luce verde ad indicare che il processo è completato. A questo punto la bottiglia è stata nuovamente sigillata e potrà essere riposta nel vano di stoccaggio.

After you serve a glass of wine, a rubber cap provided with a special check valve is inserted into the bottle neck replacing the original cork. You can seal the bottle by simply applying a light pressure after placing a fastener for the suction system. "Le Verre De Vin" is enabled with the relevant orange light indicating that the re-sealing system is working. After 2 - 5 seconds, a green signal lights up indicating that the process is completed. Now you can place the bottle back into the stocking area.

VINI SPUMANTI/CHAMPAGNE - SPARKLING WINES/CHAMPAGNE

La procedura per sigillare i vini spumanti è molto simile. Inserire nella bottiglia un fermo champagne munito di valvola, predisposto con gancio di sicurezza. Attivare "Le Verre de Vin" facendo una leggera pressione verso il beccuccio. In questo modo verrà introdotta una quantità misurata di diossido di carbonio (CO_2) all'interno della bottiglia. Si accenderà una luce verde a segnalare che il processo è terminato. Con queste semplici operazioni potrete mantenere le condizioni originali del vino per circa 21 giorni.

Sparkling wines can be sealed following a similar procedure. A special champagne cap provided with a valve and a safety hook is used to replace the original cork. After placing the fastener with a light pressure toward the lip, "Le Verre de Vin" system is triggered introducing a controlled pressure of carbon dioxide (CO_2) into the bottle. The special green sign lights up to indicate when the process is completed. These simple operations will allow to keep wine characteristics unaltered for 21 days approximately.

DISPENSER

GS 10

L'utilizzo del bag-in-box è un nuovo modo di bere vino. Grazie ai dispenser refrigerati il vino o qualsiasi altra bevanda saranno sempre facilmente a disposizione e conservati perfettamente mantenendo inalterate le loro qualità e proprietà.

The use of the bag-in-box is a new way to drink wine. Thanks to the refrigerated dispensers the wine or any other beverage will always be easily available and stored perfectly while maintaining their qualities and properties.

I PREGI DEL VINO BAG IN BOX:

THE ADVANTAGES OF THE BAG-IN-BOX ARE:

- L'assenza del tappo di sughero elimina ogni rischio di contaminazione da TCA, ovvero il vino che sa di tappo.

◆ *Since there is no cork to seal the wine there is no risk of TCA contamination, so no wine has cork taint or has been corked.*
- Protezione del vino dal contatto con l'aria e quindi dall'iperossidazione.

◆ *The wine does not come into contact with air so it is protected from hyper oxidation.*
- Il vino può essere conservato nella confezione aperta anche oltre 20 giorni.

◆ *Wine can be kept in the open package for more than 20 days.*
- Le confezioni chiuse permettono di conservare adeguatamente il vino per periodi variabili tra i 4 e i 12 mesi in funzione della tipologia di vino.

◆ *Closed packages allow proper storage of the wine for variable time periods between 4 and 12 months according to the type of wine.*
- Minimo impatto ambientale: peso ed ingombro ridotto minimizzano l'inquinamento dovuto al trasporto, i bag in box sono riciclati separatamente e smaltiti nella raccolta differenziata.

◆ *Reduced environmental impact: minimum weight and size decrease pollution due to transport. Bags-in-a-box are separately recycled and disposed of separately.*
- I bag in box sono molto leggeri, robusti, maneggevoli, sovrapponibili e compatti.

◆ *The bags-in-box are very light, sturdy, compact, easy to handle and can be piled up.*
- Il trasporto e lo stoccaggio dei bag in box risulta molto economico e semplice.

◆ *Transport and storage of bags-in-box is very simple and not expensive.*

GS 20

Il Dispenser refrigerato per bag-in-box nasce dall'idea di ottimizzare l'uso dei bag in box sia a livello domestico che commerciale e mantenere il prodotto alla temperatura corretta è di fondamentale importanza per gustare vino di qualità a prezzi concorrenziali.

Ip S.p.a. propone diverse soluzioni di wine dispenser refrigerati per soddisfare tutte le esigenze di ristoratori e clientela privata.

Tutte le macchine sono plug-in, non occorrono impianti di nessun tipo, sono facilmente spostabili e non necessitano di manutenzione.

The dispenser of cooled wine is born from the idea of optimizing the use of the bags-in-box both at home and in restaurants and bars. To be able to serve and maintain the product at the appropriate temperature is extremely important in order to taste quality wine at a competitive price.

Ip S.p.a. proposes dispensers of cooled wine able to satisfy the needs of restaurants/caterers and private clients/customers.

Every machine is plug-in, no special installation is needed, such equipment can be easily moved around and no maintenance is requested.

PARETE VINO

PARETE VINO

COS'E' LA PARETE VINO?

WHAT IS "PARETE VINO" ?

La Parete Vino è un innovativo sistema modulare che consente di creare vere e proprie pareti attrezzate destinate all'esposizione, conservazione e servizio del vino. Le diverse tipologie di cornici e di finiture rendono possibile l'ambientazione della Parete Vino sia in ambienti di tipo classico che moderno. La Parete Vino è dotata di un innovativo sistema di refrigerazione basato sul posizionamento della serpentina di raffreddamento al centro della vetrina. Un'altra caratteristica particolarmente distintiva è l'esposizione orizzontale delle bottiglie che conferisce un elegante design e garantisce una perfetta visibilità delle etichette. Il basso consumo energetico è garantito dalla doppia porta con vani separati, che consente di aprire solo metà vetrina, con un ottimo isolamento laterale.

"Parete Vino: Wine Wall" is an innovative modular system to assemble a fully-equipped wall to display, store and serve wine bottles. The different types of frames and finishes allow to install Parete Vino to match any room decoration either classic or modern. Parete Vino is equipped with an innovative cooling system based on a cooling coil positioned at the center of the case. Another important feature is the horizontal position of the bottles, which forms an elegant display and ensures perfect visibility of all labels. Low energy consumption is ensured by the double glazed doors and separate compartments that allow opening only half case, in addition to an excellent side insulation system.

POSSIBILI INSTALLAZIONI

Installation

La Parete Vino è costruita con materiali di altissima qualità tecnica ed estetica ed è progettata per essere installata con assoluta semplicità.

Parete Vino is manufactured with high technical and aesthetic quality material; it is also designed for easy assembly

DA APPOGGIO (PM)

Tutti i moduli sono costruiti con il lato posteriore chiuso da un pannello di alluminio coibentato (moduli refrigerati) o da un pannello in legno (moduli neutri). Per questa installazione è necessario prevedere i pannelli laterali.

STANDING (PM)

All modules are manufactured with the rear side closed by an insulated aluminum panel (refrigerated units) or a wooden panel (neutral units). Side panels are required to complete this installation.

DA INCASSO (PM)

Tutti i moduli sono costruiti con il lato posteriore chiuso da un pannello di alluminio coibentato (moduli refrigerati) o da un pannello in legno (moduli neutri).

BUILT-IN (PM)

All modules are manufactured with their rear side closed by an insulated aluminum panel (refrigerated units) or a wooden panel (neutral units).

CENTRALE (PC)

Tutti i moduli sono costruiti per lasciare visibilità e possibilità di utilizzo da entrambi i lati, infatti le porte vetrate sono presenti sia nella parte anteriore che posteriore. Per i moduli neutri sono previsti vani passanti.

CENTRAL (PC)

All modules are designed to ensure visibility and access from both sides, since glass doors are present both at the front and the back. Neutral cabinets have pass-through open spaces.

Con l'installazione ad incasso su cavalletto si ottiene uno straordinario effetto scenografico nel quale sia la vetrina che le bottiglie acquistano maggiore visibilità. Il cavalletto è singolo ed è provvisto di piedi regolabili e deflettore di aria calda. Il pannello in medium density è costruito in tre diverse misure per uno, due e tre moduli.

With the built-in installation on a stand you get a stunning visual effect thanks to which both the showcase and the bottles acquire greater visibility. The stand is single and is provided with adjustable feet and hot air deflector. The medium density panel is made available in three different sizes: for one, two or three modules.

MODULO D

LA LINEA

The Line

Con l'utilizzo del modulo "D" è possibile realizzare due diverse soluzioni espositive, il Banco Vino e l'installazione sospesa a pensile. Per realizzare una elegante esposizione enogastronomica, in aggiunta ai moduli per il vino, si possono inserire moduli neutri, salumeria e gastronomia.

Using unit "D" is possible to create two different display solutions : the BANCO VINO and the suspended cabinet. To realize an elegant enogastronomic display in addition to bottle units it is possible to add also neutral units, delicatessen and gastronomy ones.

CORNICE
VINO 2

LA LINEA

The Line

La linea "Cornice Vino" è dotata di un innovativo sistema di refrigerazione basato sul posizionamento della serpentina di raffreddamento al centro della vetrina. Questo sistema, oltre a garantire le migliori condizioni di conservazione, ha reso possibile l'utilizzo di vetri su tutti i lati e di conseguenza la massima visibilità delle bottiglie esposte.

The "Cornice Vino" line is equipped with an innovative cooling system based on the positioning of the cooling coil to the centre of the window. This system, in addition to ensuring the best storage conditions, has made it possible the use of glass on all sides and therefore the maximum visibility of the bottles on display.

Noise Level : CV 85 S = 40 dBA – CV 180 S = 55 dBA

CORNICE
CIOCCOLATO
2

L'eleganza della linea Cornice sposa finalmente la pralineria. Il microclima a temperatura controllata ed a bassa umidità consente di preservare la qualità estetica ed organolettica del prodotto nel tempo. Pur avendo una capacità espositiva molto superiore ad un tradizionale banco pralineria, la Cornice Cioccolato può essere inserita anche in spazi molto ridotti.

If the elegance of the Cornice line finally meets the world of pralines

The micro-climate with controlled temperature and low humidity allows you to preserve the aesthetic and organoleptic quality of the product over time. Despite having a display capacity much higher than a traditional praline counter, the Cornice Cioccolato can be inserted even in very small spaces.

NUMERO 12

In detail

Il Quadro Vino n. 12 è un espositore refrigerato per una bottiglia e due bicchieri.

La minima profondità e l'installazione a parete ne consentono l'inserimento anche in spazi molto ridotti.

La refrigerazione è ottenuta mediante un silenzioso impianto termoelettrico ventilato con sbrinamento automatico che non richiede alcuna manutenzione.

È un oggetto studiato principalmente per la camera hotel ma capace di rendere speciale ogni ambiente in cui è inserito.

Quadro Vino No. 12 is a cooled stand housing a bottle and two glasses.

The minimum depth and wall mounting allows it to be inserted even in very small space.

Cooling is obtained through a noiseless ventilated thermal power system with automatic defrosting unit which requires no maintenance.

It is an item mainly designed for hotel rooms but able to make unique every environment housing it.

QUADRO NUMERO 52 - *QUADRO NUMBER 52*

NUMERO 52

In detail

Il Quadro Vino n. 52 è un espositore climatizzato per cinque bottiglie e due bicchieri, un nuovo modo di esporre, conservare e servire il vino.
 Aprire un quadro, prendere una bottiglia di vino e servirla ad una temperatura di 16 °C è un'azione assolutamente nuova che non avremmo mai pensato possibile. È uno speciale complemento d'arredo che, inserito in cucina o nel salotto, piuttosto che nella sala di un ristorante o di un hotel, non può passare inosservato. La refrigerazione è ottenuta mediante un silenzioso impianto termoelettrico ventilato controllato da un termoregolatore elettronico attraverso il quale è possibile impostare e visualizzare la temperatura.

*Quadro Vino No. 52 is an air-conditioned stand for five bottles and two glasses, a brand new way to display, store and serve wine.
 Open a picture-like stand, take a bottle of wine and serve it at a temperature of 16°C is a totally new experience, something we never thought possible. It is a special piece of furniture which, when placed in the kitchen or in the living room, rather than in a restaurant or a hotel, cannot go unnoticed.
 Cooling is achieved through a noiseless ventilated thermal power system controlled by a digital temperature controlled through which you can set and display the temperature.*
